

## The new travel card in public transport is called Waltti

Waltti travel card will be introduced in buses 3.8.2015, but you can already purchase it in advance.

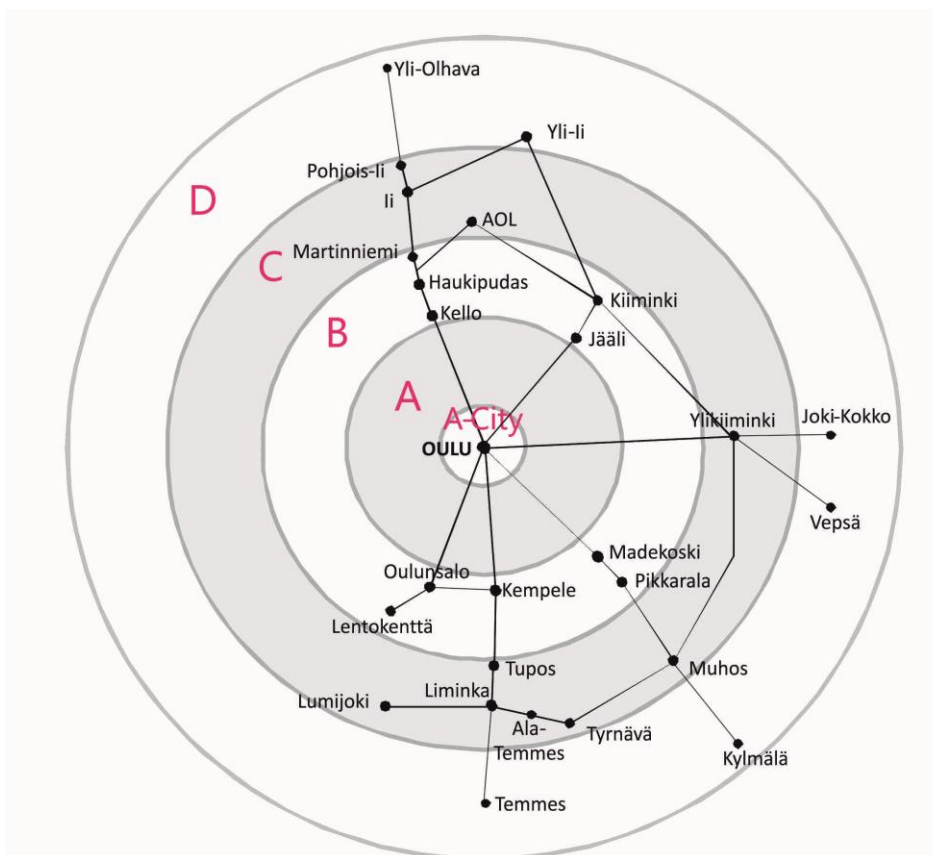

### Waltti ticketing system in short

The new Waltti travel card facilitates daily travel. Using the service and paying fares is made easy.

You can purchase single tickets from the bus, but travelling is always cheaper with travel card. [We recommend you to purchase Waltti travel card online](#). You can load 30-day season tickets or value to your travel card. Travel card can also be bought from Oulu10 service point, but ordering online saves you from possible queuing at the service point.

Public transport system Oulun joukkoliikenne is divided up into zones from A to D that radiate from the centre. The urban area within about 10 km radius from the citycentre is zone A and the regions further from that are B, C and D. Nearly all the hotels, University of Oulu and the main sights are in zone A. The airport is in zone B. The number of zones you travel through during your trip will determine your fare.

A-City ticket is valid only in citybus.

Validity of single and value tickets is 60 minutes when travelling in one zone or two zones, and 80 minutes in three or more zones. You can transfer from one vehicle to another within the validity of your ticket.
