General Info

The aim of Extensive Studies Curriculum in Arts Education in Music is to create the conditions for the development of a good relationship with music. The aim is for the student to develop their musical skills and enjoy learning. Teaching equips students to practice music independently and to continue their music studies in accordance with the student's abilities on other levels of education.

The main content of the studies is a versatile acquaintance with the basic playing technique, repertoire and artistic expression of the instrument chosen by the student. In the studies, a variety of musical tools and working methods are introduced, taking into account the student's goals. The development of skills needed to play together in a group, and music perception skills, as well as historical awareness, are an integral part of studies. In the Entrance Examination, you can choose the main instrument from a selection of either classical music or pop, rock & jazz music.

Based on the Entrance Exams, applicants are ranked in each instrument. Some of the applicants accepted in the Entrance Exams will be placed as students right from the beginning of the following school year, but most will wait in reserve until more vacancies become available. The Oulu Conservatory will send out a notice which informs you that a vacancy is available for you. If you have not received such notification by the end of next February, be sure to fill in the new electronic application form that opens in March.

On the following pages of this Application Guide, you will find useful information on how to apply for a student and on Entrance Exams.

During the test lesson the teacher will have a conversation with the applicant, observe his/her ability to concentrate and evaluate his/her motor abilities, ear for music and sense of rhythm.

The young applicants are not expected to have previous studies in piano playing. Already before the Entrance Exam, the applicant should choose a song to sing for the entrance committee.
