

Business Challenge Clinic Programme

We are going to start the session with everyone opening Teams and their group's Miro board. Do the *Goat Scale* ice breaker exercise.

Next, all the Swedish companies will get to present their student companies.

Finally, you will be divided into your Teams rooms and start to work together in smaller groups! You should have Teams and Miro open at the same time. Each group has their own Miro board which you have received in your email.

Group work in breakout rooms

1. Introduce yourselves by telling your names to each other in the group.

2. Questions (4 min)

Finnish students, ask your questions from the pre-task and other questions you might have. Swedish students answer the questions.

3. Brainstorming solutions individually (5 min)

Each person in your group should work individually. Write each solution on a separate Post-it note and move it to the "brainstorming cloud". Create as many ideas as possible to solve the challenge. At this stage, the more ideas you have the better! Write down unrealistic and crazy ideas, too.

If you want, you can improve or develop other people's ideas by adding suggestions on more Post-it notes next to their idea.

YOU HAVE TO MOVE TO THE NEXT EXERCISE AT 11:35/12:35!

4. Choose one idea and develop 1 solution further (15 min)

As a group, look at all the ideas and choose one that you would like to develop in the next step. (Remember that you also can combine several ideas into one.) Work on filling out the canvas on the Miro board together. Now you will develop the idea that you've chosen in more detail. You should also prepare to present your idea to the whole group.

At 11:50 (Swedish time) and 12:50 (Finnish time) you will all come back to the main Teams room to present your results.

5. Presentations of solutions with everyone (10 min)

Finnish students present the groupwork, 3 min presentation per group.
