## Presentation of SSAB & Hybrit / Study visit at their location

Did the study visits give you any new perspectives or ideas?

You can write down your thoughts here:

## Study visit with Naturskyddsföreningen

## Info

Marie Karlsson and Johanna Nilsson from Naturskyddsföreningen will meet you at Gültzauudden. It is a green area just outside the town center. It will take around 30 minutes to walk there from the city center. The area is pretty large, so they will meet you next to this yellow house.

Study visit at Luleåbiennalen 2024

Luleå Konsthall, Kulturens Hus, Skeppsbronsgatan 17

***This visit can be done at any time possible for your team within the three days!***

## Opening Hours

16/4 10:00 – 17:00

17/4 10:00 – 17:00

During your open working time, you can choose for yourselves when you'd like to visit the art exhibition. It is at Kulturens Hus, on the ground floor, and you just walk through the house until you reach the art exhibition.

Luleåbiennalen 2024 - On the threshold of 1:1 – takes place in different places all around Norrbotten. During our event we will have the chance to visit parts of the exhibition at Kulturens Hus in Luleå. This art exhibition takes place every second year, and luckily for us, this year their theme is the same as ours – the industrial transition and social transformation in northern Sweden!

Did the art exhibition give you any new perspectives or ideas?  
You can write down your thoughts here:

## Open working time

You have had 2-4 ideas that you like. Choose one idea that you will continue to develop during the rest of the innovation camp:

## CHECKPOINT II

You should now have **one idea** that you will continue to develop during the rest of the innovation camp. This Checkpoint time is for students. As teachers, please check with your students in the afternoon Fika whether they have proceeded to this point during the day.

## Team work session: Sustainability of your solution

During this workshop, students continue to develop their idea with a particular focus on the three spheres of sustainability. At the end of the day student teams should have pitched their idea to their coaching teacher teams. Please give feedback to your student team so that they can make their pitch on the next day even better.

### CHECKPOINT III

Students should now have developed their idea and worked through details of social, environmental, and economic sustainability. They have an answer to the questions:

- How does our solution benefit people?
- How does our solution benefit nature?
- Who pays for it and how?

They have started to work on your pitch and asked feedback or guidance from their coaching teacher team. They can continue planning the usage of possible photos, B-rolls and other things they may want to include to their solution/pitch also during your dinner and tomorrow morning.
